

One-Time Setup Fee:

\$500 per form. If form requires custom development work, (i.e. we must develop an application that already does not exist to either grab data from a home-grown system or push data to a CRM without a pre-built Zapier integration), an additional \$150 per hour applies. Similar setups don't count against balance (i.e. 3 Meta forms with the exact same fields would count as 1 setup, but 3 Meta forms with 3 different setups would count as 3 separate setups)

Monthly Maintenance (If Propellant is managing)

In addition to the one-time setup fee, if Propellant hosts and manages processes on behalf of client, the below monthly pricing applies.

- \$150/m for up to 10 processes
- \$300/m for up to 30 processes
- \$750/m for up to 100 processes
- Contact us for 101+ processes

Standard Sources & Destinations

Custom dev work not required for the below. This is a list of commonly used sources and destinations.

Standard Form Data Sources	Standard Destinations
Formstack	Google Sheet
JotForm	Salesforce
Gravity Forms	Hubspot CRM
Hubspot	Nutshell CRM
WPForms	Pipedrive
